DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-14, 21-23, and 25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 200016478. See the abstract. The method claims are inherently required by **fig. 2**.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 15-20, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of WO 200016478.

Applicant has admitted that BAW are well known in the art.

The Applicant does not admit that $\text{Sr}_3\text{TaGa}_3\text{Si}_2\text{O}_{14}$ is known in the art.

WO 200016478 discloses the use of $\text{Sr}_3\text{TaGa}_3\text{Si}_2\text{O}_{14}$ as a piezoelectric substrate with a desirous coupling coefficient. The court has found that the selection of a known material based on its suitability for its intended use is obvious. *In re Leshin*, 227 F.2d

197, 125 USPQ 416 (CCPA 1960). *Sinclair & Carroll Co. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945). It would have been obvious to one of ordinary skill in the art to use $\text{Sr}_3\text{TaGa}_3\text{Si}_2\text{O}_{14}$ in a BAW for the purpose of using its coupling coefficient.

The method claim is necessitated by the structure of claim 5.
